

JacHacks SF 2026

Sunday, July 26, 2026 • 8:00 AM – 10:00 PM

Founders, Inc. • Fort Mason, San Francisco

Welcome to JacHacks SF! A one-day AI hackathon hosted by Jaseci Labs, with \$10K+ in prizes. This is your go-to guide for the day: everything you need to know in one place. Questions? Drop them in **#ask-an-organizer** on Discord and we've got you.

Location

JacHacks SF takes place at **Founders, Inc.**, a 42,000 sq ft startup campus at Fort Mason, right on the San Francisco Bay between Fisherman's Wharf and the Golden Gate Bridge.

- **Address:** Founders, Inc., Fort Mason Center, 2 Marina Blvd, Building B300, San Francisco, CA 94123
- Check-in, hacking, meals, workshops, judging, and the closing ceremony all happen on-site.

Volunteers and organizers will be around all day to point you in the right direction. Look for the JacHacks signage when you arrive at Fort Mason.

Getting There

Public Transit

- **Muni:** The 28, 30, 43, 47, and 49 lines all stop within a short walk of Fort Mason.
- **BART:** Take BART into downtown SF, then transfer to a Muni bus or grab a ~15-minute rideshare to Fort Mason.

Driving & Parking

- Fort Mason has an on-site paid parking lot. Street parking in the Marina is limited, so budget extra time if you drive.

Rideshare

- Drop pin: "Founders Inc" or "Fort Mason Center, 2 Marina Blvd." Both work.

What to Expect

What is a hackathon?

A hackathon is a short-timeframe building event. In this context, to "hack" means to create. At JacHacks SF you'll meet fellow builders, learn new tools, and ship a project in a single day with free food, swag, workshops, mentorship, and prizes along the way. Come with or without a team or an idea, and we'll give you the space to build something awesome.

I've never been to a hackathon and I'm nervous.

Excellent! You'll find yourself right at home. Total beginners, students, professionals, and founders are all welcome.

Do I need to know how to code?

No programming experience is necessary. We'll have workshops and mentors to help you throughout the day, including a Jac intro workshop that takes you from zero to shipping.

Do I need a team?

Nope. Come solo and we'll help you find a group at team formation. Teams max out at 4 people.

Schedule

Any day-of updates will be posted on Discord.

Time	What	Details
8:00 – 10:00 AM	Check-In, Breakfast + Networking	Grab your badge, eat, meet other builders, and start forming teams
10:00 – 10:30 AM	Opening + Keynote	JacHacks welcome, followed by a keynote from Prof. Jason Mars
10:30 – 10:45 AM	Hackathon Briefing	Rules, tracks, prizes, sponsor resources (Google DeepMind + Koyal AI), judging criteria, and how to submit
10:45 AM	★ Hacking Begins	Clocks start. Build.
11:00 AM – 12:00 PM	Jac Workshop	One hour, zero to shipping on Jac. All levels. Don't skip this.
11:00 AM – 1:00 PM	First Build Block	Finalize teams, lock in ideas, start building
1:00 – 2:15 PM	Lunch + Networking	Lunch is served! Keep planning while you eat
2:15 – 3:30 PM	Second Build Block	Mentor office hours and sponsor support continue
3:30 – 4:30 PM	Career AMA with Jeff Nguyen (open floor for recruiting + internship questions)	Jeff Nguyen is the Founder of BobaTalks and a University Recruiter @ Tesla. Get resume feedback, internship recruiting advice, and Q&A. Teams can keep hacking if they prefer.

Time	What	Details
4:30 – 5:30 PM	YC Application Workshop	With Mehul from Koyal AI (YC F25) and Vatsal (Ex-YC): how to actually apply to YC
4:30 – 6:00 PM	Third Build Block	Focused building, testing, and mentor support
5:50 PM	★ Partial Submission Checkpoint	Please submit your draft to be considered for judging !! This way we can organize judging. You can keep editing after
6:00 – 6:45 PM	Dinner	Dinner runs alongside hacking so you don't lose a build hour
6:45 – 7:15 PM	Final Build + Submission Period	Finish your demo, submit, and prep your pitch
7:15 PM	🛑 Submissions Close	HARD DEADLINE !! To keep the event running smoothly, late submissions are not accepted
7:15 – 7:30 PM	Judging Setup	Teams move to assigned demo areas
7:30 – 8:15 PM	Project Demos + Judging	4-minute demos, judged in parallel groups
8:15 – 8:45 PM	Judges Deliberate	Network while scores are finalized
8:45 – 9:15 PM	Second Round Demos	Top teams demo again
9:30 PM	Closing Ceremony	Winner announcements, prizes, sponsor + judge recognition, group photos, and final networking

Packing List

It's one day, so pack light:

- **Laptop + charger** (non-negotiable)
- Phone charger
- A government-issued ID or student ID for check-in
- Layers! Fort Mason sits right on the bay and SF summer means wind and fog, especially in the evening. Bring a jacket even if the forecast looks warm.
- Water bottle
- Headphones/airpods for lock-in mode
- Any hardware you want to hack with (nothing oversized, dangerous, or illegal)

Discord

Join our Discord if you haven't already → <https://discord.gg/uGGKmKEFd>

Discord is our main communication channel for the day. Announcements, schedule updates, mentor requests, and team matching all happen there. **Join before the event** and post any questions in **#ask-an-organizer**.

WiFi

WiFi details will be posted at check-in and on Discord.

API Credits + Promos

Some of our sponsors have generously offered credits and access for their platforms. Redemption links will be posted on Discord before hacking begins.

Submissions

Submissions will be on Devpost: <https://jachacks-sf.devpost.com/>

*****IMPORTANT: Please make your first partial submission at 5:50 PM to be considered for judging. You can still make changes and edit. Final submissions are at 7:15 PM. No late submissions will be accepted.**

Submissions checklist:

- ☐ Github link (Code must contain 40% of Jac)
- ☐ Demo video
- ☐ Written description on project (including a description of how you used Jac or any Jaseci Labs products)
- ☐ ★ Github star jac: <https://github.com/jaseci-labs/jac>

Prizes & Tracks

All projects are eligible for track prizes. When you submit on Devpost, select the tracks you'd like to be considered for. Pick the ones that meaningfully fit your project.

Track	Place	Prize	Notes
Agentic AI	1st Place	\$2,000	Best agentic AI project built at JacHacks SF
Agentic AI	2nd Place	\$1,000	

Track	Place	Prize	Notes
Fintech / Open	1st Place	\$1,500	Best fintech project, or best project overall in the open track
Fintech / Open	2nd Place	\$800	
Social Impact	1st Place	\$1,500	Innovation with the most significant societal impact
Social Impact	2nd Place	\$800	
Best JacHammer	Special Award	\$500	The team that hammers hardest on Jac — most impressive use of the Jac language

Prize amounts and additional sponsor tracks will be finalized before the event. Watch Discord for updates.

Rules

To be eligible for prizes, your team and project must follow all of the below:

1. All members of your team must have registered and checked in to JacHacks SF.
2. At least one member of your team must be present to demo your project to judges.
3. All hacking and building must take place during hacking hours (10:45 AM – 7:15 PM on Saturday, July 26). Brainstorming beforehand is allowed and encouraged, but all coding must happen during the event. **We WILL check your GitHub repo.**
4. Your team cannot have more than 4 people.
5. You cannot have more than 1 project.
6. Submit your project on Devpost before the deadline. Late submissions are not eligible for prizes.
7. Must build a working software project using 40% of Jac, the AI-native programming language from Jaseci Labs. That's the one requirement: your project must meaningfully use Jac.
8. Be kind, be respectful, and build in good faith. Misrepresenting what your project actually does is grounds for disqualification.

Judging

Judging happens in person after submissions close. You'll give a short live demo to a panel of judges. The detailed rubric will be shared on Discord, but broadly: working demos beat slide decks, and clear problem-solution stories beat feature dumps.

Food

Yes, of course we'll feed you. Breakfast, lunch, dinner, and snacks all day. Dietary restrictions? Flag them on your Luma registration or ping us on Discord.

Sponsors (THANK YOU!!)

About Jaseci Labs

JacHacks is the hackathon series from **Jaseci Labs**, the team behind **Jac**, an AI-native programming language. Across our first two events we've hosted 500+ hackers who shipped 150+ projects. Learn more at jaseci.org or check out the open-source repo at github.com/jaseci-labs/jaseci.

Questions??

Post in **#ask-an-organizer** on Discord, or find any organizer on-site. Happy hacking 🧡
